Raw Material Procurement-to-Payment Process

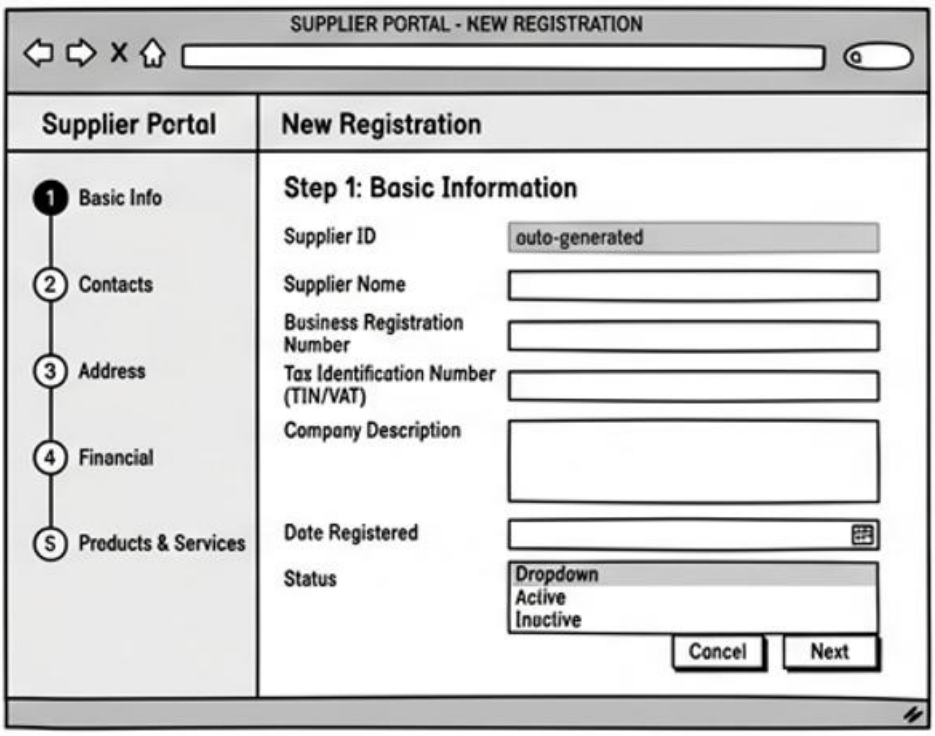

The process starts with a **Purchase Requisition (PR)** raised by the Storekeeper when raw materials are required. The PR is reviewed and approved by Management, after which the **Purchasing Department** converts the approved PR into a **Purchase Order (PO)** and sends it to the supplier.

Once the supplier delivers the materials, the goods go through **Inspection/Quality Control** to verify that they meet the required specifications. If the materials pass inspection, the **Storekeeper performs Receiving Goods and generates a Goods Receipt Note (GRN)**. The accepted quantity is then added to the raw material stock.

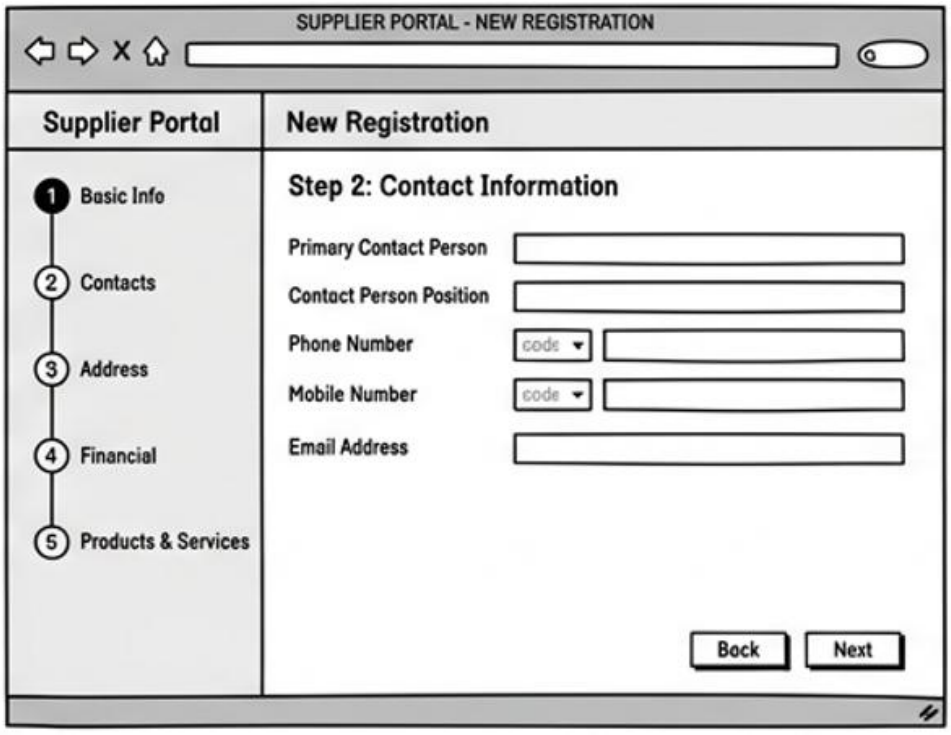

After the GRN is completed, the **Finance Officer raises a Payment Request** based on the approved **PO, GRN, and supplier invoice**. The payment request is reviewed and approved by the authorized approver. Finally, the **Finance Officer processes the supplier payment** using the approved payment method, such as cheque or bank transfer.
